

KOÇ UNIVERSITY

Science – Math Seminar

Speaker: Prof. Colin Graham, Visiting Professor, Dept. of Mathematics, Koc University

Date: Thursday, February 23, 2006

Time: 16:45 (Tea and cookies will be served at 16:30)

Place: Science building, Room Z42

Title: The mystery of the Fourier transform

Abstract:

The connexion between properties of a function and properties of its Fourier transform is not always clear. This expository talk will focus on some aspects of this, and possibly end with the statement of a result in this area that is due (in its present version) severally and jointly to F. J. Gonzales and myself.
